

# Acceptable Use Agreement - Workforce

## St Catherine's Catholic Academy September 2021

Our Mission is to behave in the way Jesus taught us. He said "I have set you an example: that you learn that you are all equal, that the Master is no more important than the servant, and that you should behave kindly and humbly towards each other."

**Date of Update** – September 2021

**Date of next Review** – September 2022

# Sheffield Catholic Schools Partnership

This Acceptable Use Policy is intended to ensure that school IT and communication systems are used in a safe way and are kept operational for the benefit of all in the school community.

This agreement applies any time you use any systems provided by the school, whether on school premises or remotely and from any device, school owned or personal.

School IT systems are designed to support teaching and learning, systems should primarily be used for study, teaching, or administrative purposes. The school allows for modest personal use of school systems providing the terms of this policy are not breached and that personal use is not detrimental to your duties.

## Acceptable Use Policy Agreement

### School systems in general:

- At all times your use of school IT systems will be consistent with the values and ethos of the school.
- Use of school systems must be consistent with all other school policies including those on Data Protection and Social Media Policy. You must read and understand these.
- Do not disclose your username or password to anyone else, or try to use any other person's username and password. If someone else knows your password change it immediately and notify IT Support staff.
- You must not use the school systems to conduct any form of commercial activity without the express permission of the Headteacher.
- You may not use any form of virtual private network or file sharing software unless authorised to do so.
- You may not install any software or attempt to run any software from any other source without the express approval of IT Support staff.

### Monitoring:

- School systems are monitored and filtered for the safety of all users. You must not attempt to circumvent any monitoring and your usage can be reviewed at any time.

### Communication:

- Some email can contain malicious links or code, please be vigilant for suspicious email and if you are unsure check with IT Support staff before opening any email or link that you are suspicious of.
- School provided e-mail accounts may be accessed by other members of staff as deemed appropriate to ensure smooth running of the school. Access is at the discretion of a member of SMT or the IT Support staff, for example for the purposes of business continuity where a member of staff is absent through illness.
- You must only communicate with students and parents and carers using official school systems.

### Using your own device:

- You may only connect your personal device (smartphone / tablet / laptop etc) to the designated wireless network of the school and only when suitable credentials are provided by the school. You must not connect any device directly to the physical network cabling of the school. Any use of any school systems (even via your own device) is filtered and monitored.
- You must not store any personal data relating to the school, its staff or pupils, including images on personal devices, even if only temporarily. The only exception to this is that you may synchronise school mail to a personal mobile device providing that device is solely used by you and is protected by either a fingerprint or other method of locking. You must not synchronise mail to a shared device of any sort, e.g. family computer or shared tablet.

### Data Protection:

- You must only transport, hold, disclose or share personal information about yourself or others, as outlined in the school's Data Protection Policy (or other relevant policy). You must not transfer data from school systems without the express permission of the school Data Protection Officer, unless it is covered by policy documentation. All transfers of personal data must be encrypted to prevent inadvertent data loss.
- The school data protection policy requires that any staff or student data to which you have access, will be kept private and confidential, except when it is deemed necessary that you are required by law or by school policy to disclose such information to an appropriate authority.
- If you become aware of a data breach, potential or actual, you have a duty to report it to the data protection officer as soon as you become aware of the breach.

### Acceptable Use Policy Agreement

I have read and understand the School Workforce (Staff and Volunteer) Acceptable Use Policy and I agree to use school systems according to this policy.

I understand that if I fail to comply with this Acceptable Use Policy Agreement, I could be subject to action under the school's disciplinary policy, and in the event of illegal activities, the involvement of the police.
