

Biometrics Data Policy

ST CLARE

Catholic Multi Academy Trust

Our Mission is to behave in the way Jesus taught us: He said “I have set you an example, that you learn that you are all equal, the Master is no more important than the servant, and that you should behave kindly and humbly towards each other.”

St Clare Multi Academy Trust Biometric Data Policy

What is biometric data?

Biometric data means personal information about an individual's physical or behavioural characteristics that can be used to identify that person; this can include their fingerprints, facial shape, retina and iris patterns, and hand measurements.

All biometric data is considered to be special category data under the General Data Protection Regulation (GDPR). This means the data is more sensitive and requires more protection and this type of data could create more significant risks to a person's fundamental rights and freedoms.

This policy complies with The Protection of Freedoms Act 2012 (sections 26 to 28), the Data Protection Act 2018 and the GDPR.

What is an automated biometric recognition system?

An automated biometric recognition system uses technology which measures an individual's physical or behavioural characteristics by using equipment that operates 'automatically' (i.e., electronically). Information from the individual is automatically compared with biometric information stored in the system to see if there is a match in order to recognise or identify the individual.

The legal requirements under GDPR.

'Processing' of biometric information includes obtaining, recording or holding the data or carrying out any operation or set of operations on the data including (but not limited to) disclosing it, deleting it, organising it or altering it.

As biometric data is a special category data in order to lawfully process this data, St Catherine's must have a legal basis for processing personal data and a separate condition for processing special category data. When processing biometric data, the school rely on explicit consent (which satisfies the fair processing conditions for personal data and special category data). Consent is using the consent form provided by the school.

At this time, St Catherine's does not use biometric data.

Consent and Withdrawal of consent

The school will not process biometric information without the relevant consent.

Consent for pupils

When obtaining consent for pupils, both parents will be notified that the school intends to use and process their child's biometric information. The school only require written consent from one parent (in accordance with the Protection of Freedoms Act 2012), provided no parent objects to the processing. If a parent objects to the processing, then the school will not be permitted to use that child's biometric data and alternatives will be provided.

The child may also object to the processing of their biometric data. If a child objects, the school will not process or continue to process their biometric data, irrespective of whether consent has been provided by the parent(s).

Where there is an objection, the school will provide reasonable alternatives which will allow the child to access the same facilities that they would have had access to had their biometrics been used.

Pupils and parents can also object at a later stage to the use of their child's/their biometric data. Should a parent wish to withdraw their consent, they can do so by writing to the school at the contact details found on the Trust website, requesting that the school no longer use their child's biometric data.

Pupils who wish for the school to stop using their biometric data do not have to put this in writing but should let the Headteacher know. The consent will last for the time period that your child attends the school (unless it is withdrawn).

Consent for staff

The school will seek consent of staff before processing their biometric data. If the staff member objects, the school will not process or continue to process the biometric data and will provide reasonable alternatives.

Staff who wish for the school to stop using their biometric data should do so by writing to the Headteacher. The consent will last for the time period that the staff member remains employed by the school (unless it is withdrawn).

Retention of Biometric Data

Biometric data will be stored by the school for as long as consent is provided (and not withdrawn). Once a pupil or staff member leaves, the biometric data will be deleted from the school's system no later than 72 hours. At the point that consent is withdrawn, the school will take steps to delete their biometric data from the system and no later than 72 hours.

Storage of Biometric Data

Biometric data will be kept securely and systems will be put in place to prevent any unauthorised or unlawful access/use. The biometric data is only used for the purposes for which it was obtained and such data will not be unlawfully disclosed to third parties.
