Appendix 2

Fire Procedure at St Catherine's Catholic Primary School

It is the policy of this school to eliminate the risks from fire, so far as is reasonably practicable. Where fire risks cannot be eliminated, measures will be taken to reduce the risk to the lowest practicable level. In achieving this goal all sources of fuel, ignition and any other factors that are under the company's control will be considered. A fire risk assessment will be conducted in accordance with current legislation. The assessment will result in an action plan and appropriate risk control measures.

The person responsible for the implementation of this policy is the School Business Manager.

The fire risk assessment will be conducted by the Local Authority contractor appointed through the annual arrangement. The fire risk assessment will be recorded, including details of all significant findings.

The fire risk assessment will be reviewed annually, or more frequently where considered necessary. The fire risk assessment will be reviewed after any incident that has caused, or could have caused a fire of any significant failure in the fire detection, control or evacuation procedures.

Information, training and instructions will be provided to all staff with particular regard to those individuals who are nominated as having specific duties.

A fire drill will be conducted at least once a term, the interval or number of drills may vary if it is considered that there is a need to provide additional training.

All fire evacuation routes will be clearly marked and lit.

The fire assembly point is determined in the fire risk assessment.

A record of persons will be maintained on the premises and on evacuation all persons will be accounted for.

The School Business Manager will liaise with the emergency services. In their absence the deputy will be the Finance Officer.

Fire equipment will be maintained by the Local Authority contractor appointed through the annual arrangement.
